

BBVCC Lakes Committee Meeting Notes  
September 4th, 2013

**Board Members:**

Ken Hecker, Gary Levy, Larry Eide, Bernd Werny, Gene Carr, Rick Whitaker

**Present:**

Ken Hecker, Gary Levy, Larry Eide, Bernd Werny, Rick Whitaker, Ken Hoffer

**Meeting Notes:**

for 8/7/13, approved.

**Carp Update:**

No new sightings of "new" smaller fish. The permit is for 1 year. Tentative plans are in place for additional fish by end of permit period. Final numbers to be determined at next meeting. Current plan calls for 100 each for Thunderbird and Kwan, plus 125 for assorted ponds around the golf course.

**Chemical Applications Update:**

The 10 week cycle for CACL has been completed. 1 more application of blue dye.

**Lake/Pond Conditions:**

Overall not bad, however, given the low rain levels, high heat, we have some higher levels of algae.

"smell" at Kwan Lake has not been identified. Not always there.....possibly from the Slough?

**Status on the Compressors:**

A unit in front of "Gene's" place was not bubbling. Rick was able to get better bubbling activity by moving the unit to a higher spot on bottom to perform better. Seems to be working better at this time.

**Other Lake Business**

Larry found "small leeches" on the bottom of his boat in Kwan. No one was quite sure what these maybe....Larry will try and obtain samples to help identify if this is a larger issue.

BBWARM is instituting new policies and procedures regarding storm water runoff for the greater Birch Bay. This may or may not have an impact on our neighborhood. Ken Hoffer is aware and on top of this, and so far sees no major impact on our procedures.

**Confirmation of Next Meeting:**

Wednesday October 2, 2013
